THE BEST WAY TO HAVE A GOOD IDEA IS TO HAVE LOTS OF IDEAS // Linus Pauling

Finding Footage is a search-engine targeted towards video editors, films, videographers, designers and anyone else who requires stock footage in their production or presentation, with royalty free license.

The new search engine allows users to find video content in a smarter and richer way. Our search engine has been designed for users who are interested in a wider view with wider variety of results from the stock footage market, while searching for and buying royalty-free footage on the Internet for personal or commercial use.

Finding Footage offers a number of stock video collections (Editor's Choice) that are divided into many different subjects and keywords, Presenting the best from many.

Our users can also find a wide range of hand picked free footage collection on the website as well. All Free footage has been picked and embedded from top stock video contributors and creators into one place, helping our users to easily view everything...

Finding Footage will reduce search time and provide more expansive results.

About Finding Footage :

Finding Footage aims to become a leading search engine platform and stock footage curator for users looking for stock video content, including video backgrounds and other types of stock footage.

The company has also introduced a number of affordable video backgrounds and animated wallpapers packages (Full HD + 4K), designed for powerpoints, youtubers, keynote and anyone who wants to use video backgrounds without having to pay over the top.

Ends.
